

Removing Software Tutorial #19

To begin removing software off your computer, you must:

- (1) Left click on “Start”
- (2) Left click on “Control Menu”
- (3) Double left click on “Add or remove programs”
- (4) The Add or Remove program menu will open, left click on the software you want to delete
- (5) Left click on “remove”

- (6) A page will come up asking if you wish to remove the program, left click on “yes”
- (7) Another page will come up called “Windows Installer.” This will begin to remove the software off your computer. This page will go away whenever the program is successfully taken off
